Elite White

How does the creation of masterpieces of painting, literature, writing a notebook of life begin? That's right, from scratch!

The world shows not only bright colors that capture the imagination, but also inspires with purity.

Especially for connoisseurs, we have created a new shade – Elite White.

Dense, resistant, perfectly lying in one layer, perfectly combined with absolutely any colors. Crystal-paper shade will become your inspiration for creativity, an indispensable assistant in creating the perfect jacket. The very "blank slate" for creating the beautiful.

Easy to use: self-leveling, does not flow, the time of complete polymerization is 60 seconds.

The black color on the nails causes quite contradictory opinions. For some, it looks stylish and beautiful, while others perceive it more cautiously, consider it mourning and even sinful. And all this only says that a black manicure is not suitable for everyone. Moreover, it must be able to wear it and correctly match it to a certain image. Interestingly, according to history, only ladies from rich society could choose this color of nail polish. After all, it was considered an indicator of luxury and excellent taste. Of course, over time, the attitude towards such a color changed, and it had both ups and downs. Over time, representatives of different cultures began to actively use it. For example, rockers, pacifists, hippies and even Goths. Now he has regained his popularity. For example, almost every brand considers it necessary to add black to the collection. Therefore, it will be extremely difficult to surprise someone with a monochrome nail coating. And many nail artists add a little shimmer or glitter to the dark base.
